

“Maqsad” tariff line

“Maqsad” tariff line - for individual entrepreneurs without forming a legal entity (hereinafter - an individual entrepreneur) and for their partners/employees in the Prepaid system.

1. Additional Information

The tariff line is available for connection:

- For partners/employees of an individual entrepreneur, it is necessary to provide the original of your passport with the provision of a completed certificate (a certificate for connecting corporate tariff plans in the Prepaid system for individual entrepreneurs and their partners/employees) - if it is available.
- The tariff plans are available for new connections and for switching to active plans within the “Maqsad” lineup. The switching fee is 0 UZS. USSD code: *120#.
- When changing the tariff plan inside the line to high tariff plans, the limits are preserved.
- When changing the tariff plan inside the line to lower tariff plans, the limits are reset to zero.
- “Restart” service is activated using USSD *222#.
- The following services are available for the “Maqsad” tariff line subscribers: “You`ve got a call”, “Convenient minutes”, “Number freeze”, New monthly internet packages, monthly internet packages, Unlimited Ucell packages in underground (only the “Unlim for 30 days” package), “Al Chiroq” promotion, “New monthly internet packages” (for Doimiy, Sof), SO TAS-IX line 8000/14000/20000, “Traffic+”, Mediabay.uz media portal, iTV service.
- The following services are unavailable for the “Maqsad” tariff line subscribers: “Convenient within network” and “Convenient within Uzbekistan” packages, Daily and weekly internet packages, “Daily SMS packages”, “Night Internet”, “Ordered package”, “Hourly internet”, “Monthly 4G internet packages” and “Maximum access” service, “We appreciate you!” and “U+” loyalty programs.

2. Writing off the monthly subscription fee and the limits assignment:

- The date of write-off of the monthly subscription fee in the monthly period is the date of connection/transition of the subscriber to the tariff plan.
- With a new connection/transition to the tariff plan, the monthly subscription fee and limits are written off/assigned completely (not scale) if there is sufficient amount on the balance.
- With a lack of funds or a negative balance to write off a monthly subscription fee for the tariff, the write-off does not occur, the limits of the traffic are not assigned, the balance of the subscriber’s number is not written off as debt.
- The subscription fee is charged once a month from the date of successful debiting of the monthly subscription fee according to the tariff plan. The date of debiting the next monthly subscription fee is the date of the last successful debiting of the subscription fee according to the tariff plan.
- The next monthly subscription fee is debited and limits within the tariff are assigned in the period from 00:00 to 08:00 (the debiting time is not fixed). To charge the monthly subscription fee in full, the subscriber must have sufficient funds on the balance.
- If at the time of charging the monthly subscription fee there are not enough funds on the balance to charge the fee, then the subscriber's number is blocked. The subscription fee is not debited until there are sufficient funds on the balance to charge the subscription fee in full.
- The monthly subscription fee will be debited immediately upon replenishing the balance with a sufficient amount to charge the subscription fee in full. After the subscription fee is charged, the subscriber number will go into active status and limits will be assigned according to the terms of the tariff plan. Further, the subscription fee will be debited according to the new monthly subscriber period, i.e. within 1 month from the date of the last successful charge of the subscription fee according to the tariff.

Tariffication

Tariffing by directions:	
Cost of an outgoing minute for calls within and outside the network (above the included limit)	25 UZS
Cost of 1 MB of Internet	25 UZS
Cost of outgoing SMS within Uzbekistan (above the included limit)	25 UZS
International SMS	1 500 UZS
Checking limits: *100# - minutes and SMS, MB of internet traffic	

3. Blocking conditions:

- The number is blocked if there is a positive balance, in case of insufficient funds on the balance at the time the monthly subscription fee is charged according to the tariff plan, or a negative balance, if the corresponding additional services are available;
- Monthly limits within the tariff plan are assigned only after successful charging of the monthly subscription fee according to the tariff for the current period. Monthly limits of the tariff plan are provided for 1 month from the date of assignment. Remaining monthly limits assigned in the current period are not carried over to the next month.
- To avoid misunderstandings, we recommend you to first replenish your balance with a sufficient amount to charge the subscription fee in full and check the assignment of limits for the tariff plan using the USSD request *100#.
- When the monthly limits within the tariff plan are spent, calls and SMS are charged according to the cost in directions in excess of the limits under the terms of the tariff plan.
- If the monthly Internet traffic limit on the tariff plan and additional Internet packages are spent, Internet access is suspended. In this case, the subscriber receives an SMS with a link to resume Internet operation. To continue using the Internet, the subscriber must select the option according to which he will continue to use the Internet:
 - Update tariff limits (“Restart” service);
 - Buy an internet package;
 - Connect mobile internet at a cost of 1 MB over the limit *

* If the subscriber chooses the option to use mobile Internet at a cost of 1 MB above the limit, and then purchases a Monthly Internet package, then after the limits of the additional package expire, the Internet will be consumed at a cost of 1 MB above the limit according to the terms of the tariff plan until the next subscription fee is charged according to the tariff.

The subscriber can also independently use the option “Connect mobile Internet at a cost of 1 MB above the limit” using the USSD request *727#.

When access to the Internet is blocked, in order to use payment system applications, the subscriber must disable the data transfer mode for correct operation in offline mode.

4. Terms of “Restart” service:

- “Restart” service is activated using USSD *222#;
- “Restart” service is available to subscribers in active status;
- The “Restart” service provides the subscriber with the opportunity to independently activate a monthly subscription fee and receive monthly limits in accordance with the terms of the tariff plan. After activating the “Restart” service, the subscriber's monthly period is updated according to the date of the last successful activation of this service;
- After activating the “Restart” service, the monthly subscription fee is debited from the subscriber's balance in the amount of the full cost and full monthly limits are assigned within the subscriber's tariff plan. Next, the subscriber's monthly subscription fee is debited according to the subscriber's new monthly period;
- To activate the service, the subscriber's balance must have a sufficient amount to charge the subscription fee according to the tariff in full. After activating the “Restart” service, the subscription fee will be charged and limits will be assigned in full according to the tariff;

- Remaining limits (SMS within Uzbekistan and MB), previously assigned within the tariff plan, are reset to zero upon successful activation of the “Restart” service;
- On the day the monthly subscription fee for the tariff plan is charged, the “Restart” service is not available for activation;
- You can use the “Restart” service only once a day (from the beginning of the current day, from 00:00 to 23:59).
- On the day of connection and transition to tariff plans, activation of the “Restart” service is not available.

Attention:

- Calls to infotainment services and international destinations do not consume minutes provided under the terms of tariff plans.
- The limits provided within the tariff plan are not available to subscribers in roaming.

Conditions for additional Internet traffic volume in the 5G network:

- The volume of Internet traffic in the 5G network issued within the tariff plan is available and consumed in the 5G network and has the highest priority for consumption;
- When the 5G volume is fully used up, the Internet is charged in accordance with the current terms of the tariff plan;
- Checking balances: *100#, *900# (in the form of SMS notification), Ucell mobile application;
- When changing the tariff plan, the volume of 5G Internet traffic is reset to zero;
- Internet traffic conditions do not apply to subscribers in roaming;

Detailed terms of service

- The monthly limit of Internet traffic in the 5G network within the tariff plan is assigned only after the successful debiting of the monthly subscription fee for the tariff for the current period. The volume of 5G Internet traffic is provided for 1 month from the date of assignment.
- 5G internet traffic volume is not available in blocked status.
- When you disable the 5G service from Ucell, the 5G Internet traffic volume becomes unavailable. When you reactivate the 5G service from Ucell, the 5G Internet traffic volume becomes available in accordance with its validity period.
- When the monthly Internet traffic limit for all directions under the tariff plan and additional Internet packages is used up, Internet access is suspended. At the same time, the volume of Internet traffic in the 5G network will be available for use in the 5G network only if the generated Internet requests require significant amounts of data transfer and high Internet speed.
- When distributing the Internet through a smartphone or other device access point, the assigned 5G Internet volume will be available only if the generated Internet requests require significant amounts of data transfer and high Internet speed.
- When connecting via proxy servers or VPN, Internet traffic consumption will not occur within the limits of the issued 5G volume.
- The priority for using unlimited Internet traffic within the special offer “Unlimited Internet 5G” is higher than the volumes of Internet traffic provided in the 5G network within the tariff plan.

5G service terms:

- Connection to the 5G service is available at the Call Center by dialing 8111, as well as in the company's own offices.
- Disabling the service is available in the Ucell mobile application, in the Company's own offices, as well as in the Call Center at 8111.
- The service is provided free of charge.
- Connection of the service is available in following statuses: active, idle.

Notes:

- 1 - Voice transmission and USSD requests are available in the 5G network (when making a call, the network mode switches from 5G to 3G/2G or 4G with the VoLTE service active);
- 2 - Availability of 5G depends on many factors, including the software of the mobile device installed by the manufacturer. Please note that some mobile device manufacturers temporarily

close access to 5G at the software level to avoid difficulties in using 5G due to low network coverage.

Important!

- By default, in a 5G network, devices can automatically return to a more stable 4G LTE network, and, accordingly, Internet traffic will not be consumed according to 5G limits.

This can happen, for example, when:

- Internet queries do not require significant amounts of data transfer and high Internet speed;
- the subscriber leaves the 5G network coverage area, or the signal quality becomes insufficient for stable operation;
- In 5G mode, devices use the 4G LTE network to establish the initial connection and control (signaling), and then switch to 5G for data transmission.

At the same time, the smartphone may display a 5G network icon.

In these cases, the consumption of Internet traffic is considered correct due to the specifics of the 5G NSA technology, and no adjustments are envisaged by the Company.
